Claims 5, 7, 9 and 10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 7, 2006.

Claims 9 and 10 are included in the withdrawn claims because they do not read on the elected species of Figure 1.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Neufeld. With regard to claims 1-4 and 8, Neufeld shows a first comparator 34, a second comparator 36, a storage unit 42 and a determination signal output unit 42. The signal applied to the comparators is the output of full wave rectifier 44. With regard to claim 6, the terminal labeled "set" on element 42 of Neufeld is a reset terminal.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All of the cited and not applied references are cited to show window comparators in various environments including ac line voltage monitors.
